TRASH ENCLOSURE REQUIREMENTS

PERMIT APPLICATION CHECKLIST

- Complete and sign Building Permit Application.
- Provide plat of survey with the location of the proposed trash enclosure including size of enclosure and distances from building and lot lines.
- Provide copy of contract including scope of work.
- Property owner approval letter if applicable.

PERMIT FEES

The cost of a trash enclosure permit is \$90.00 Residential and \$105.00 Commercial.

Additional fees may apply, please refer to the Village of Round Lake Municipal Code 20.56.010.

PERMIT GUIDELINES

- All enclosures shall be built large enough to accommodate and provide access to the waste and recycling container(s). Waste containers should be accessible by the service contractor without the need to move other containers.
- A passageway shall be provided to allow ingress and egress without opening the gate(s).
- The floor of the enclosure shall be paved with an impervious material. The approach apron shall be capable of supporting both the hauling vehicle and trash container during pick up.
- All walls and gates shall provide full screening of the contents.
- The walls of the enclosure shall be constructed of durable materials such as dimensional lumber, metal, masonry or concrete.
- A solid barrier such as a curb or set of bollards shall be installed so as to prevent containers from coming in contact with enclosure walls.
- Gates of the enclosure shall be fabricated using steel framing and mounted on tubular steel post independent from the enclosure walls. All mounting hardware shall be commercial grade, capable of harsh usage. A latching device shall be installed so as to keep gates open during trash pickup.

INSPECTIONS

1. Slab base
2. Post holes
3. Final
